

Videos

you'll be able to integrate videos from Youtube galleries, Podcast and Vimeo. If you want to integrate a business video gallery, the best is, if not already done, to create a Youtube or Vimeo channel in which you'll upload all the business's videos.

You can also create a thematic gallery from other sources than the store itself (for example a fashion video gallery for a trendy bar).

Note: Keep in mind the Videos feature is used to display galleries only. If you want to add a single specific video, please use the [Custom Page feature](#).

Here is how it works, it's quite simple:

1. YouTube

Start by naming your gallery, so that if you create several galleries, users will be able to select the one they want to watch.

Then, in the "search" field, what you're are going to enter depends on what type of search you're are going to select:

Create a gallery with only the store videos:

You already have created the store channel on Youtube and uploaded the videos to this channel. Here is how you create the gallery:

Enter the name you want for your video gallery and then the name of your Youtube Channel in the "search" field. Then choose "Channel" for "Type":

Gallery Name * :	Search/Url * :	Type * :
 First Company	MyFeelBack	Channel 

or the ID of the Youtube channel in the "search" field. Then choose "Channel" for "Type":

Gallery Name * :	Search/Url * :	Type * :
 First company	UChngQA8nbxnLfHdRf	Channel 

Example: for the Youtube

Channel <https://www.youtube.com/channel/UChngQA8nbxnLfHdRf7btIEg> the channel ID is "UChngQA8nbxnLfHdRf7btIEg".

Example: for the Youtube User <https://www.youtube.com/user/username> the user ID is "username".

Create a thematic video gallery:

Enter the name you want for your video gallery, the keyword you want to search for in the "search" field, and choose "Search" in "Type".

Here is the result:

If you want to add another gallery, just click on  and repeat the above process.

2. Podcast

You can also integrate videos from podcasts. To do this, you have to enter the name of your video gallery and the URL address of your podcast.

A form with a light gray background. On the left is a blue square icon with a white RSS symbol. To its right are two input fields. The first is labeled "Gallery Name *:" and contains the text "Gallery Name". The second is labeled "Feed URL *:" and contains the text "Feed URL".

3. Vimeo

If you want to add a channel you have to enter the ID of the channel in the “search” field and select “Channel” in the “type” select box.

You can find the ID of the channel at the end of the channel URL. For example, for this channel:

<https://vimeo.com/channels/513799> you just have to enter “513799”.

For the other types of choices (User, Group, Album), it is the same process than for Channel. Just enter the ID that appears at the end of the URL. For example, to import all the videos of this user:

<https://vimeo.com/user24085556>

enter “user24085556” in the “search” field and select “user” for type.

A form with a light gray background. On the left is a blue square icon with a white Vimeo logo. To its right are three input fields and two buttons. The first is labeled "Gallery Name *:" and contains the text "Video on Vimeo". The second is labeled "Search *:" and contains the text "user27472178". The third is labeled "Type *:" and is a dropdown menu with "User" selected. To the right of the dropdown are two buttons: "OK" and "X".
