Create a Google Maps Javascript API key

To create your Google Maps API keys:

Go to https://developers.google.com/maps/documentation/javascript

Then click on **Get started** on the upper right.

Create or select a project:

Enable Google Maps Platform

To enable APIs or set up billing, we'll guide you through a few tasks:

1. **Create a project**
2. Set up your billing
3. Pick product(s)

Projects allow you to use APIs, add collaborators, and manage permissions

Create a new project *

If you are a returning user or have projects, go to Console

CANCEL   CREATE

Create a billing account if you don't have one (this is mandatory):

Enable billing for project "My Project 0001"

You are not an administrator of any billing accounts. To enable billing on this project, create a new billing account or contact your billing account administrator to enable billing for you. Learn more

CANCEL   CREATE BILLING ACCOUNT

The account is automatically restreint to the free trial 300$ limit:

Try Google Cloud Platform for free

Step 1 of 2

Country

France ▼

Terms of Service

☐ I have read and agree to the Google Cloud Platform Free Trial Terms of Service.

Required to continue

Email updates

☐ I would like to receive periodic emails on news, product updates and special offers from Google Cloud and Google Cloud Partners.

CONTINUE

Access to all Cloud Platform Products

Get everything you need to build and run your apps, websites and services, including Firebase and the Google Maps API.

$300 credit for free

Sign up and get $300 to spend on Google Cloud Platform over the next 12 months.

No autocharge after free trial ends

We ask you for your credit card to make sure you are not a robot. You won't be charged unless you manually upgrade to a paid account.

Once you have filled the billing form, hit the "**Start my free trial**" button.

Select the 3 options and click on **Next**:

Answer the questions and click on **Next**:

Enable Google Maps Platform

Before enabling APIs, answer **four** questions to help us serve you better

1 **What is your primary goal of signing up for Google Maps Platform?**

Select a reason from the list *   ▼

CONTINUE

2 **What is your overall experience level with mapping platforms?**

3 **What best describes your role?**

4 **Which of the following industries are you in?**

SKIP   NEXT

Enable your API key:

Enable Google Maps Platform

Enable your APIs

This will enable 17 Google Maps Platform API(s) and create an API key for your implementation

CANCEL   ENABLE

Copy your API key and click on **API Console** to set the restrictions:

Enable Google Maps Platform

You're all set to start developing!

Your API Key

AIzaSyDyqnZXrJCJwqEe4mIVvnD_KE1Jhe34

ⓘ To improve your app's security, restrict this key's usage in the API Console

DONE

In **Key Restrictions > API restrictions**, select "**Restrict key**" and select the following APIs:

API APIs & Services

← Restrict and rename API key   ⟳ REGENERATE KEY   🗑 DELETE

- ⟐ Dashboard
- ⋕ Library
- ☰ **Credentials**
- ⋮⟐ OAuth consent screen
- ☑ Domain verification
- ☰☼ Page usage agreements

Key restrictions

Restrictions help prevent unauthorized use and quota theft. Learn more ⎘

Application restrictions

An application restriction controls which websites, IP addresses, or applications can use your API key. You can set one application restriction per key.

- ⦿ None
- ○ HTTP referrers (web sites)
- ○ IP addresses (web servers, cron jobs, etc.)
- ○ Android apps
- ○ iOS apps

API restrictions

API restrictions specify the enabled APIs that this key can call

- ○ Don't restrict key
  This key can call any API
- ⦿ Restrict key

6 APIs ▼

Selected APIs:

Directions API
Distance Matrix API
Geocoding API
Maps JavaScript API
Places API
Maps Static API

Note: It may take up to 5 minutes for settings to take effect

SAVE   CANCEL

◁❘

Save and you're all set!

Now you just have to copy and paste your API key in your editor in **Settings > APIs:**

(this one is used by the app):

Google Maps settings

Google Maps JavaScript API Key

Save

Save

and in your backoffice in **Settings > APIs**

(this one is used by the editor and backoffice functionalities):
